

Objective

Strong Full Stack Developer with excellent problem solving skills and 8 years industry experience, looking to take on new challenges in a fast-paced team.

Summary of Qualifications

- Thrived in a SCRUM-based Agile Software Development Environment.
- Strong object oriented programming background.
- Proven ability to set goals and expectations and meet them.
- Excellent communication and organizational skills.
- Experience working with remote team members and collaborating on projects.
- Recognized as a reliable self-starter with the ability to work independently and with minimal supervision.

Skills

ASP.NET, ASP.NET MVC, C#, T-SQL, HTML, CSS, JavaScript, jQuery, Knockout.js, Angular, SQL Server

Experience

CHC Companies Inc., Centennial, CO

Software Engineer / Senior Software Engineer (2010 – Present)

As part of the software development team, I work on building new applications and features, maintaining and supporting our software products.

- Workstream dev lead for corporate apps.
- Experience mentoring junior developers and leading projects.
- Managed a project to develop a tool to centralize the management of employee assignments and sync the same to third party systems: iCIMS, ADP and Kronos Timekeeper.
- Programmatic generation of cap report hosted in SSRS using the SSRS Report Execution Web Service on demand.
- Led a project to develop a new product to manage contractual capitation with tight deadlines and high visibility to allow the company to efficiently manage receivables.
- Built various features to enhance user experience in a home grown medical records application, ERMA. Ex: Inmate housing location finder, integration of medical assessments to patient profile, charting CIWA/COWS assessment scores.
- Migrated the data from Vizion, a legacy medical records system to ERMA, a new medical records system to enable system consolidation following an acquisition.
- Developed a suite of reports for the company's pharmacy business for distribution to the operations team and the client.
- Built a pharmacy medication inventory tool to perform quarterly inventory on medications at the client site for better forecasting and saving the company thousands of dollars.

- Successfully designed, built and tested a user friendly, intuitive and web-based contract management tool to manage 250+ client contracts and business associate agreements resulting in quick and efficient reporting on contract obligations.
- Created a web application to process electronic and paper referrals, administer classes and track monies collected, resulting in better visibility and accountability.

Epic Systems Corporation, Madison, WI

Software Developer (2009 – 2010)

Responsible for developing and maintaining various features of the Tapestry software suite.

- Upgraded ANSI X12 Transaction Set 820 from version 4010 to 5010 for HIPAA compliance.
- Proposed a proof of concept for the Tapestry team dashboards for varied user personas.
- Certified in Tapestry, Benefits Engine, MyChart, Visual Basic 6 and Server Technologies.

The Ohio State University, Columbus, OH

Graduate Associate / Student Programmer (2007 – 2009)

As a part-time student programmer, I was responsible for the development, maintenance and testing of web applications at the Office of Student Life IT.

- Investigated the impact of replacing the social security number as a unique identifier with an internal employee number to estimate the extent of changes required.
- Followed up the impact analysis with design of use cases and test cases; Redesigned SQL queries to reflect changes in the database; Successfully programmed and tested SSN replacement changes to the web application.
- Designed, programmed, tested and demonstrated a new feature to administer tests to students with special needs.

Education

The Ohio State University, Columbus, Ohio, **M.S. Computer Science and Engineering**

P.S.G. College of Technology, Coimbatore, India, **B.Tech. Information Technology**
